

GPT-4o

GPT-4O
YOUR SLIDE
WIZARD

 [/tianyuxu](https://www.linkedin.com/company/tianyuxu)

**I HATE
MAKING
SLIDES!!!**

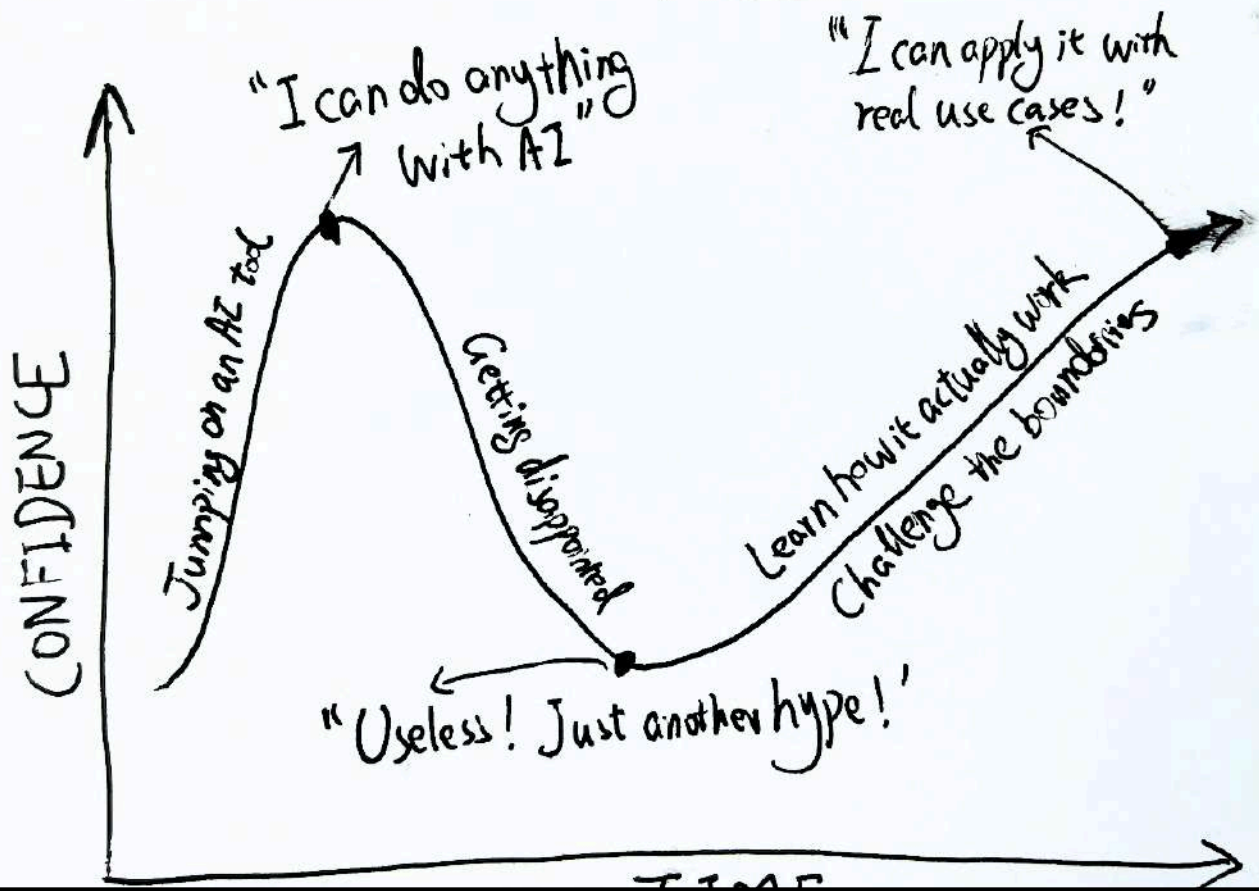

**DON'T
WORRY!
AI can
help!**

**SHOW ME YOUR
MAGIC, MR
BORING!**

**IMAGINATION
IS ALL YOU
NEED...**

 [/tianyuxu](https://www.linkedin.com/in/tianyuxu)

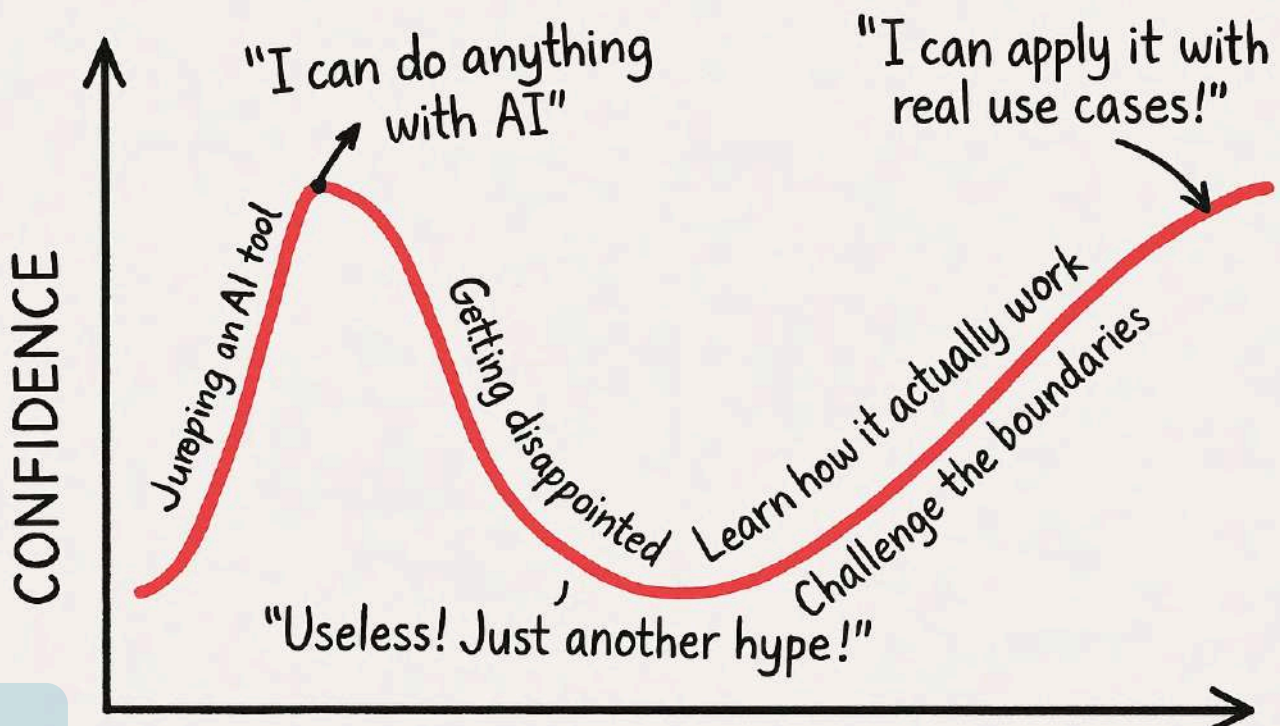

Your AI Learning Journey

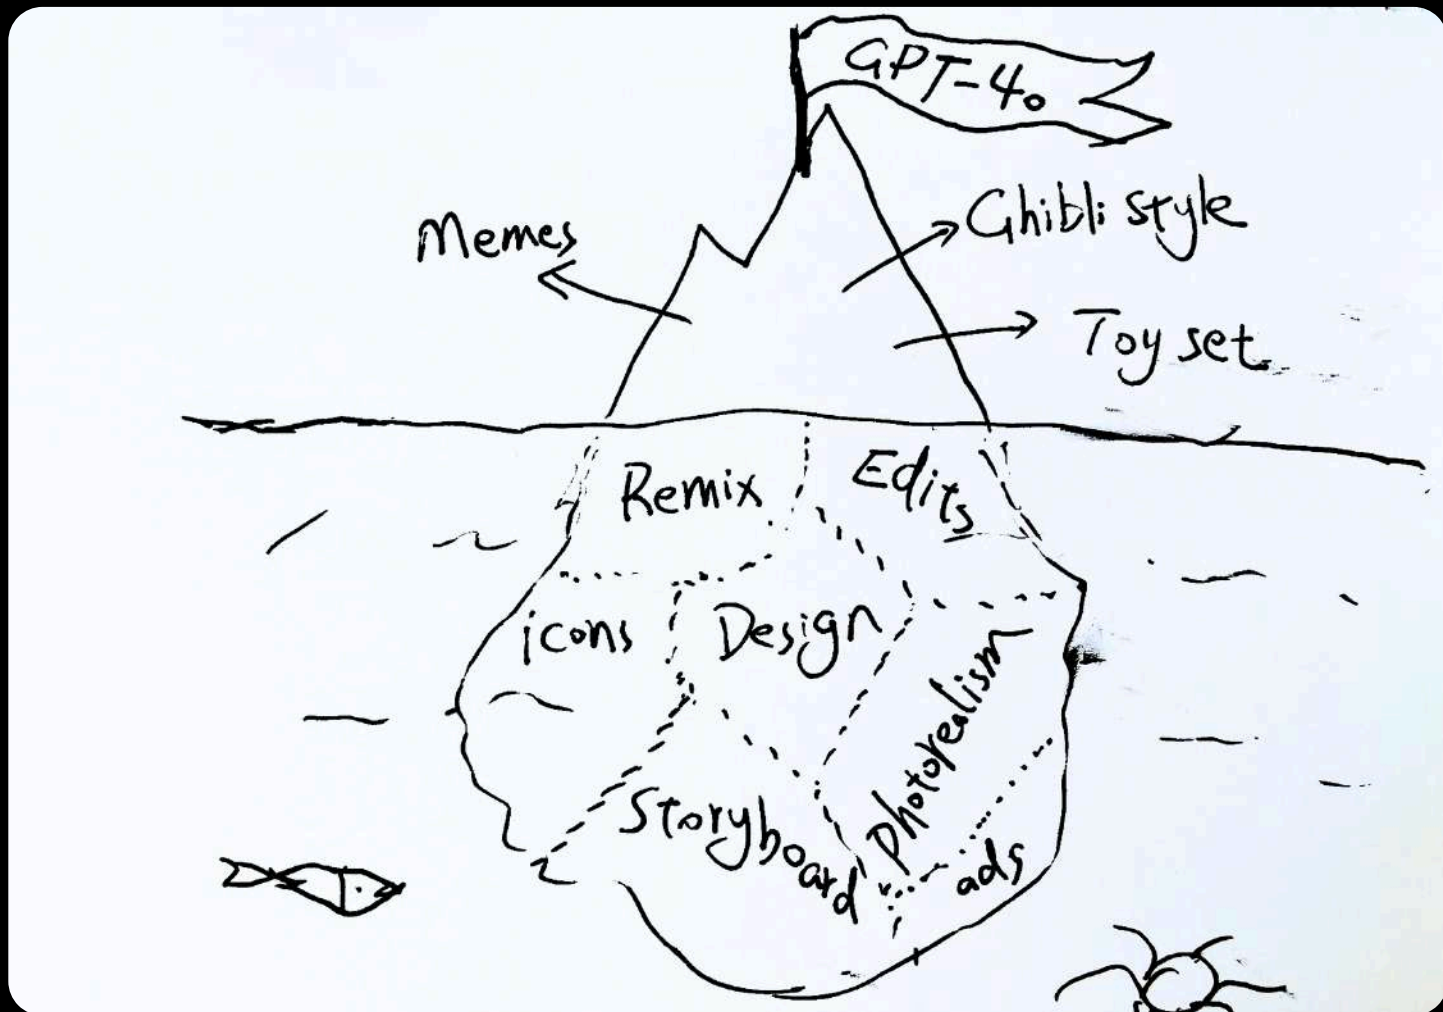

“Convert it into a slide in the style of **marker drawing**”

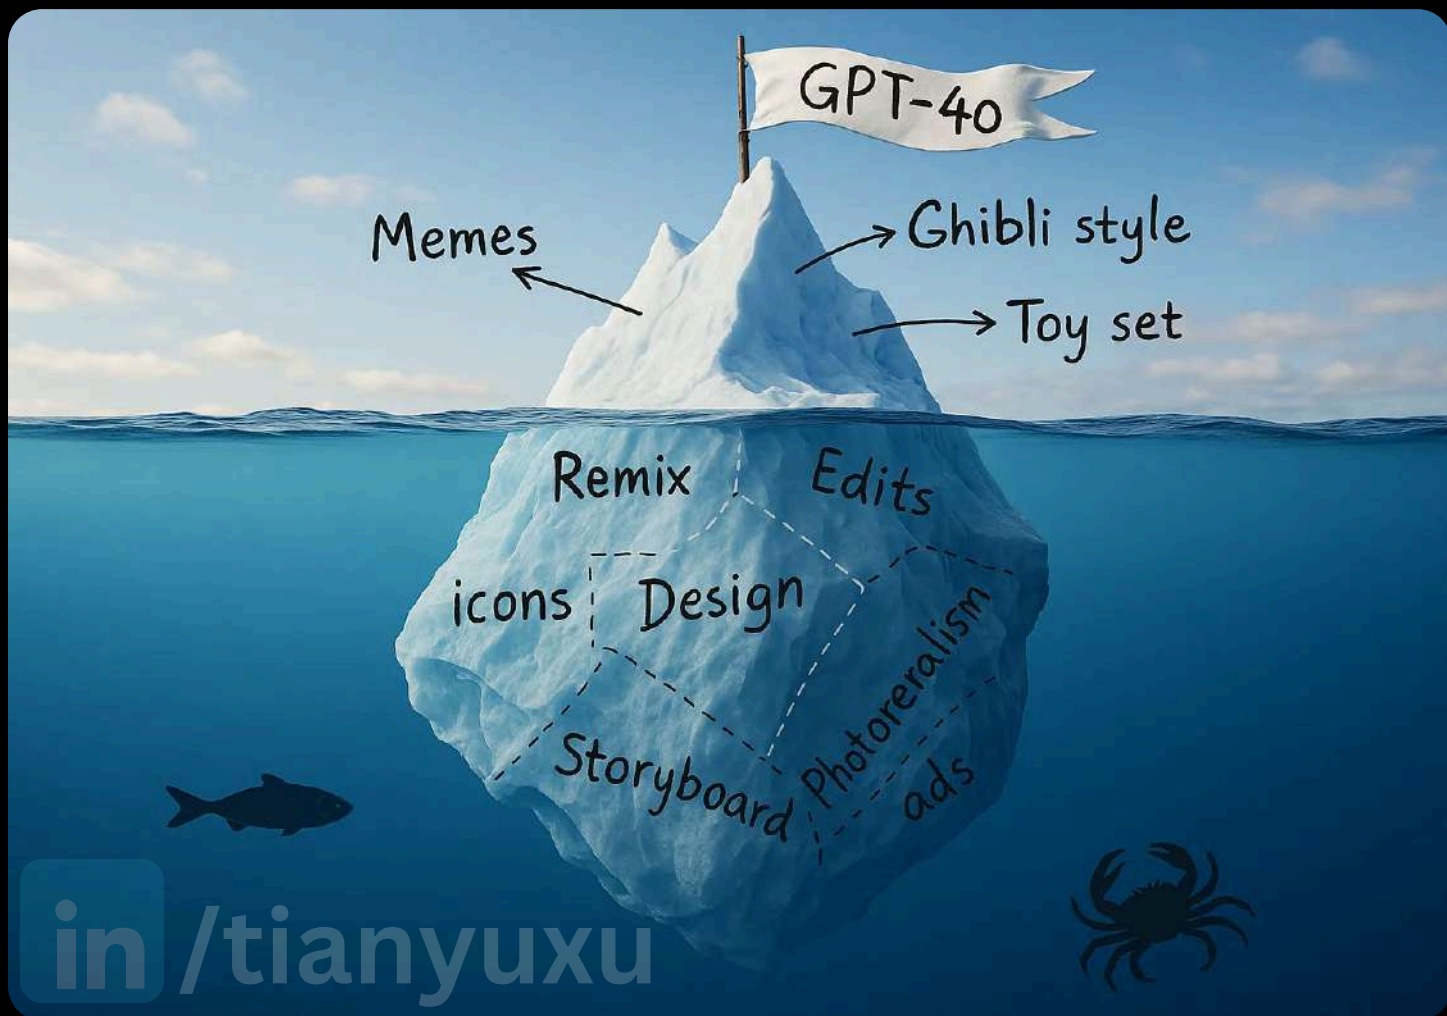

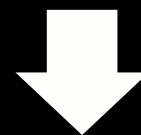

Your AI Learning Journey

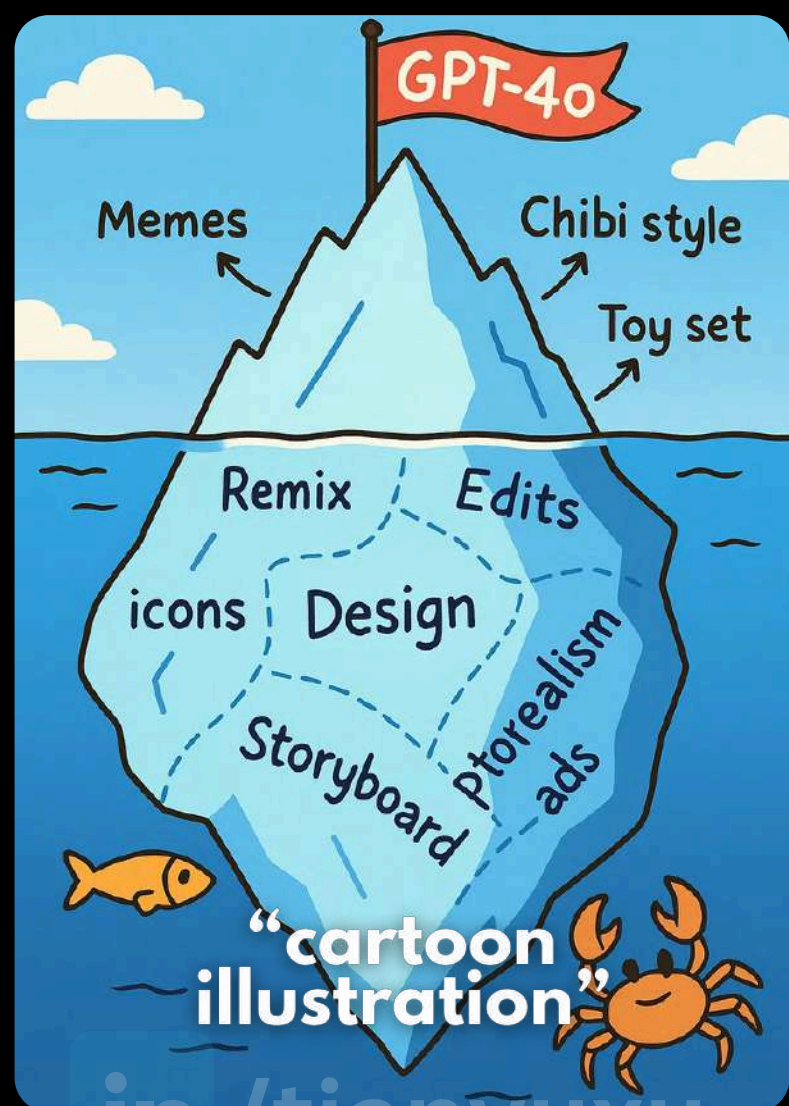

“Make it a **photorealistic** image with all labels and details”

Wow! AI can read
your poor handwriting
and drawing?
How does it work?

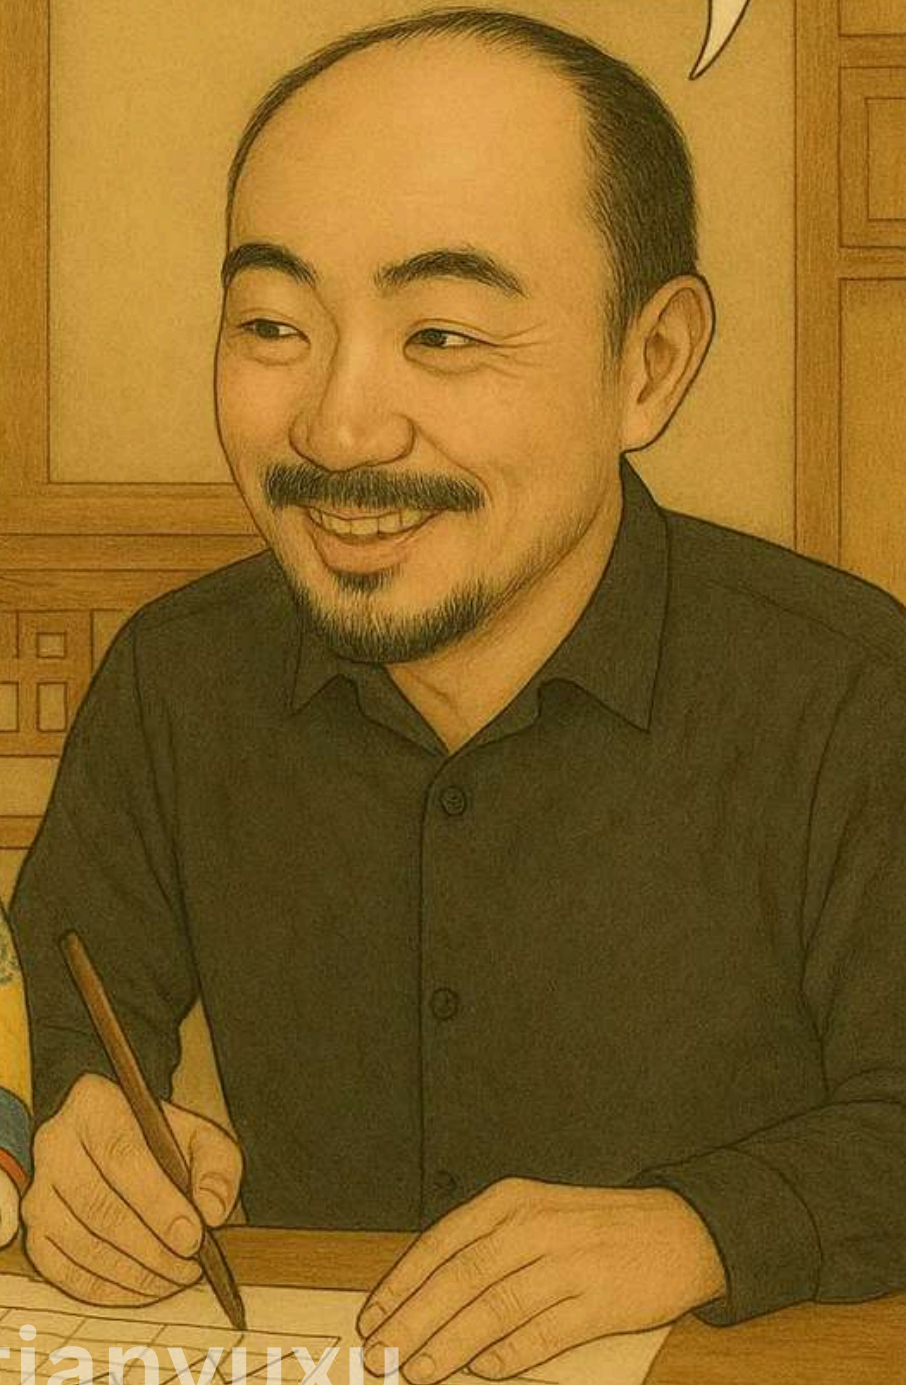

We just used the
Remix feature of GPT-4o.
Upload a drawing and
use style keywords to
convert it into any style!
And yes, even I can't
recognize my own
handwriting!

 [/tianyuxu](https://www.linkedin.com/in/tianyuxu)

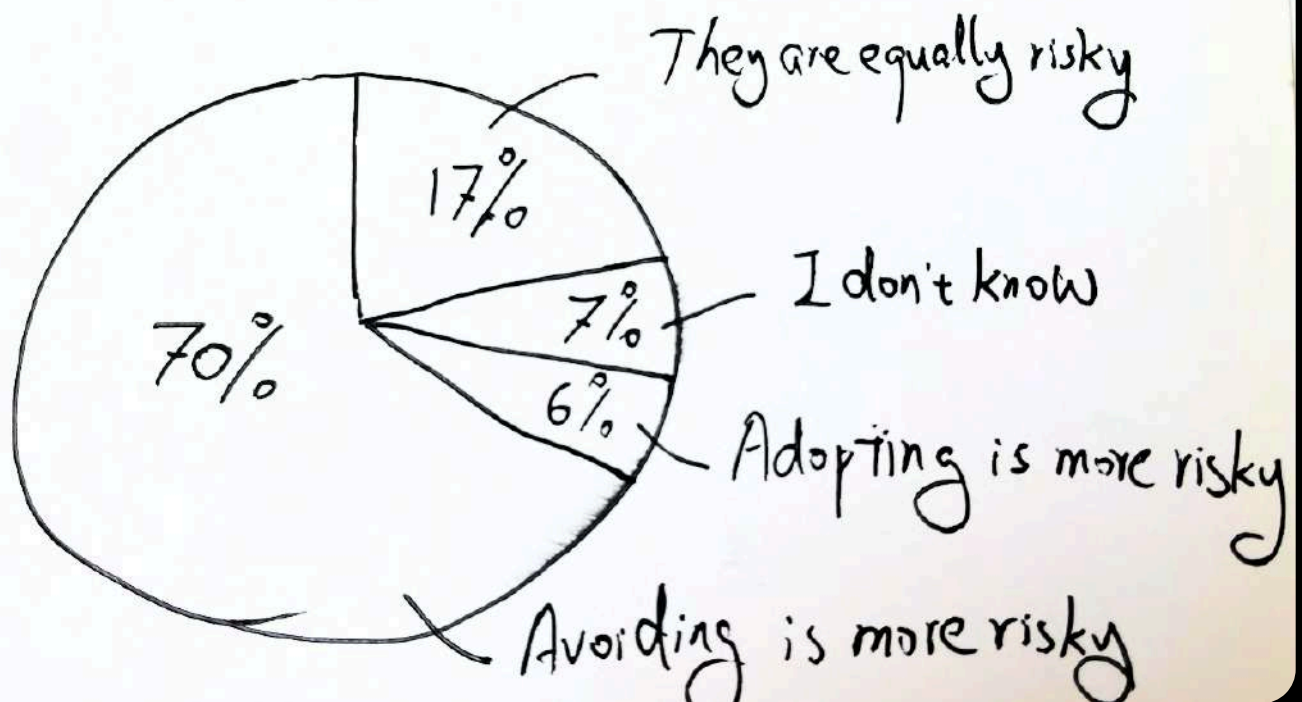

Well, maybe the AI has already been trained on plenty of iceberg diagrams! Let's try something difficult!

Of course! How about charts, tables and diagrams?

[in /tianyuxu](https://www.linkedin.com/company/tianyuxu)

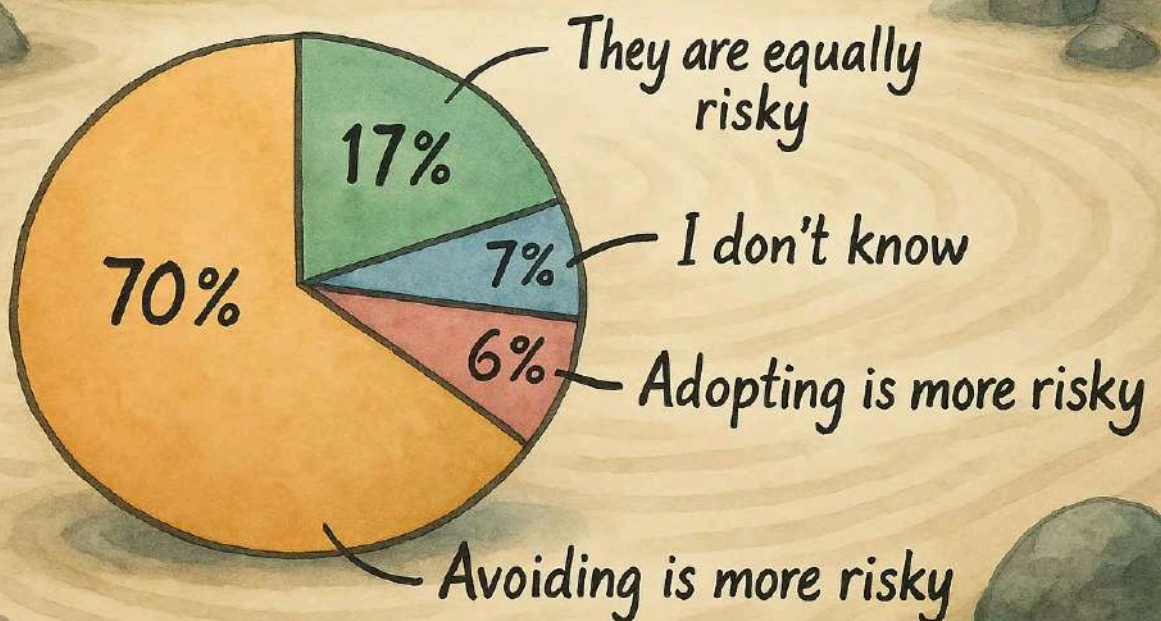

Adopting vs. Avoiding Generative AI:
Which is more risky?

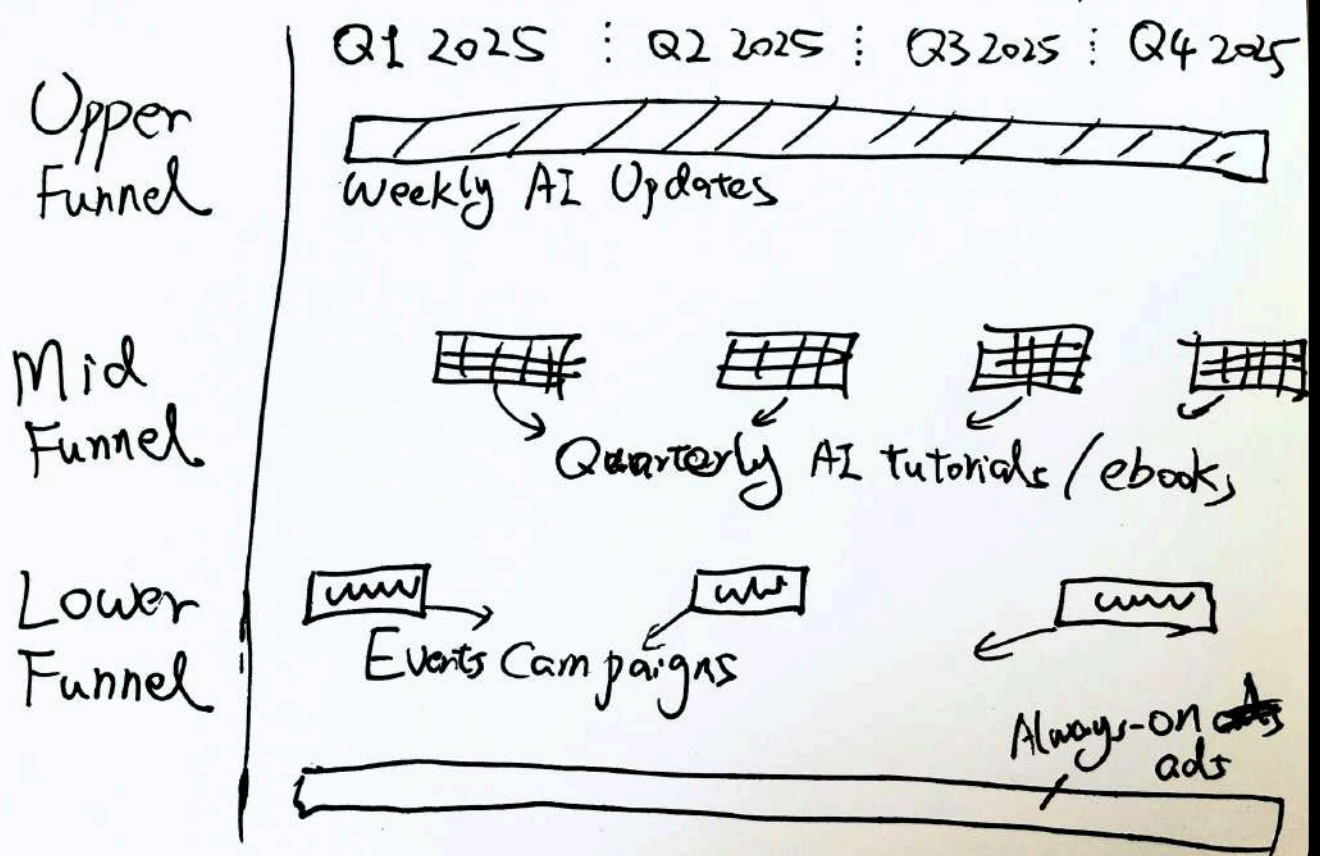

“Convert it into watercolor style, zen garden backdrop”

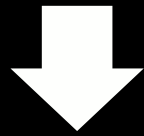

Adopting vs. Avoiding Generative AI:
Which is more risky?

LinkedIn Content Strategy | 2025

“Convert it into a colorful corporate style slide”

How does your video travel on TikTok

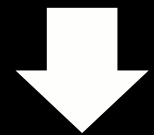

A. Initial Phase: Audience near you or in the same city.

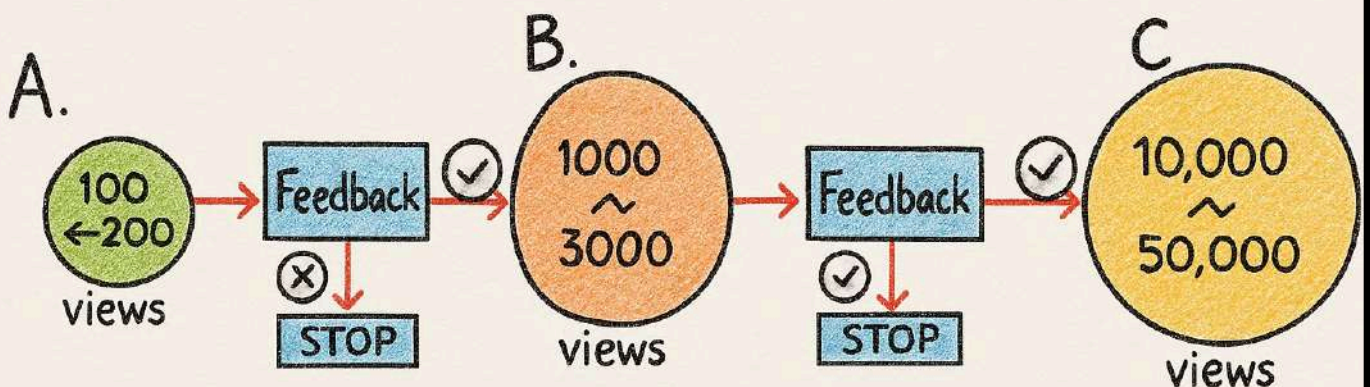

B. Warming Up Phase: Potential target audience in more locations.

C. ~~Pre~~ Pre-viral Phase: More audience from a similar category.

“Convert it into a slide in the style of **colored pencil drawing**”

How does your video travel on TikTok

B. Warming Up Phase: Potential target audience in more locations

C. Pre-viral Phase: More audience from a similar category.

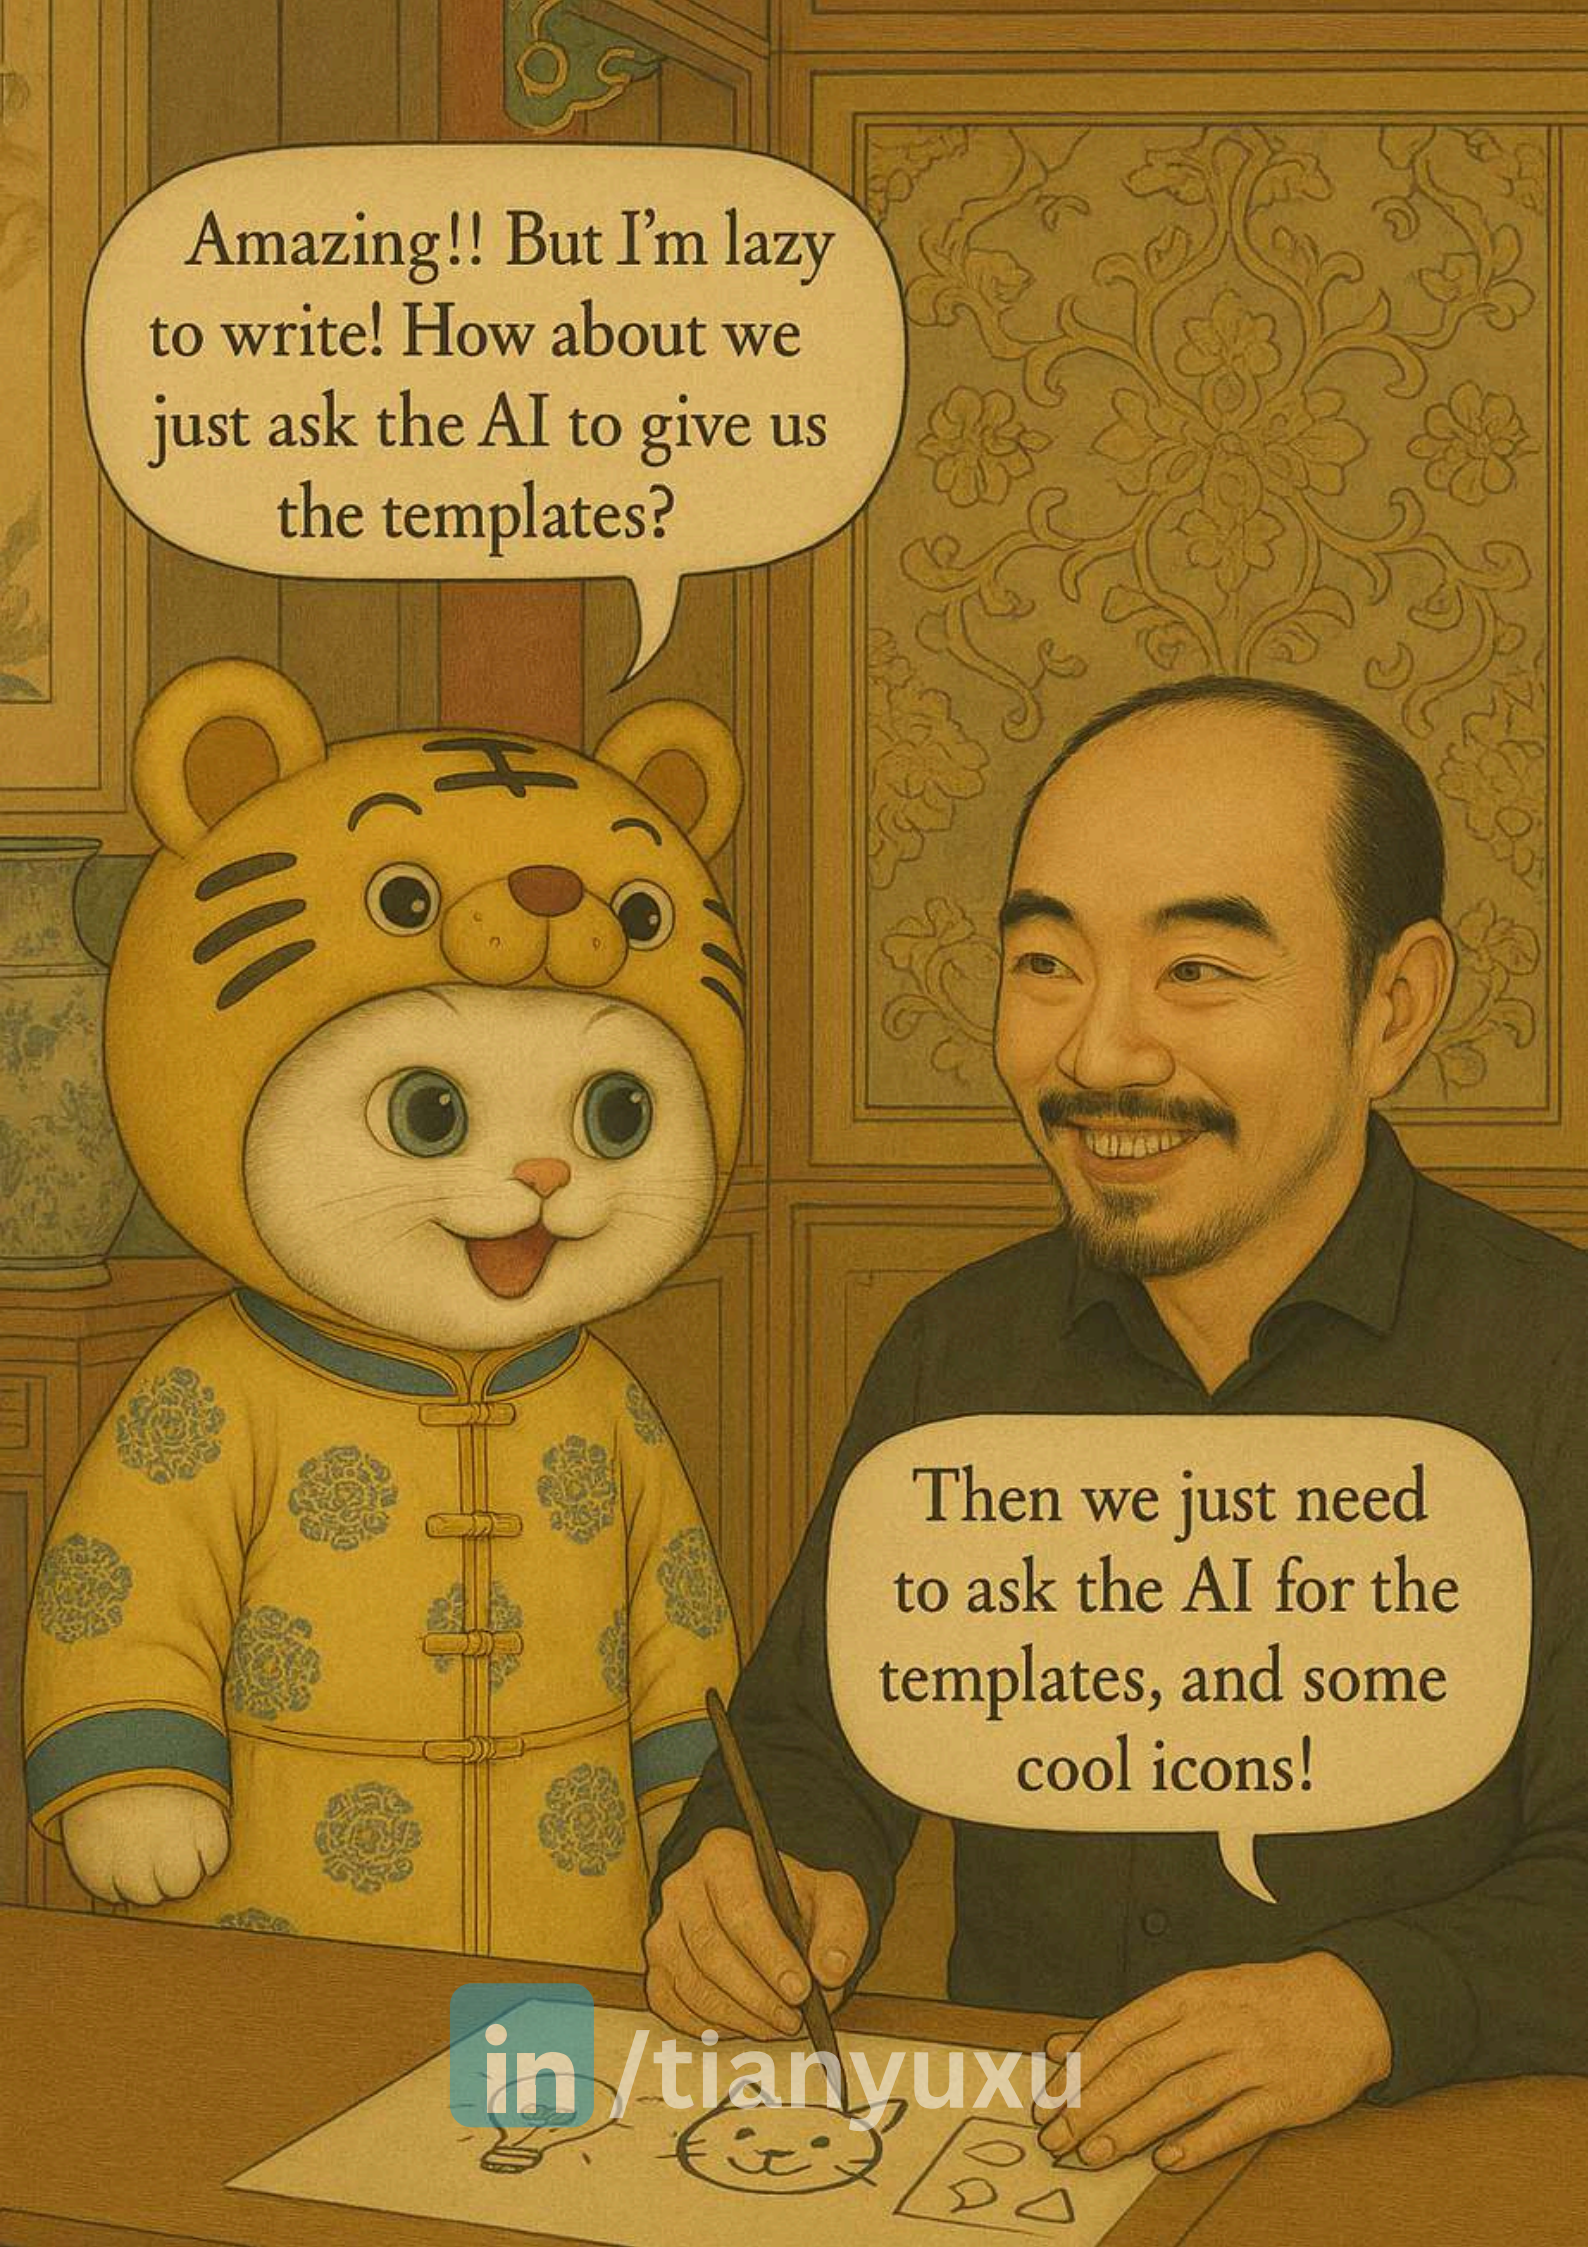

“Use a white cat dressed in the profession for the 3 bubbles”

3.7M

/tianyuxu

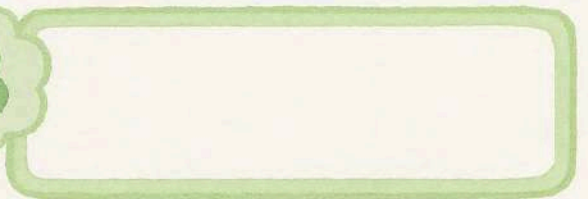

Amazing!! But I'm lazy to write! How about we just ask the AI to give us the templates?

Then we just need to ask the AI for the templates, and some cool icons!

 /tianyuxu

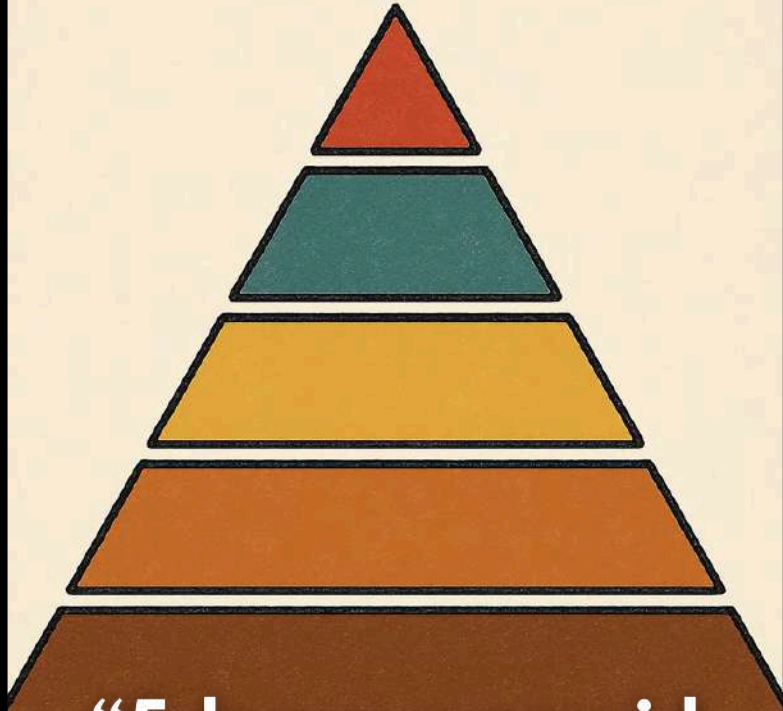

**“5-step template,
minimalism design”**

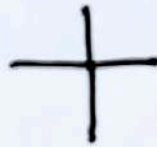

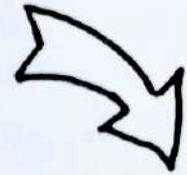

**“5-step template,
for children”**

**“5-layer pyramid
template, business
presentation style”**

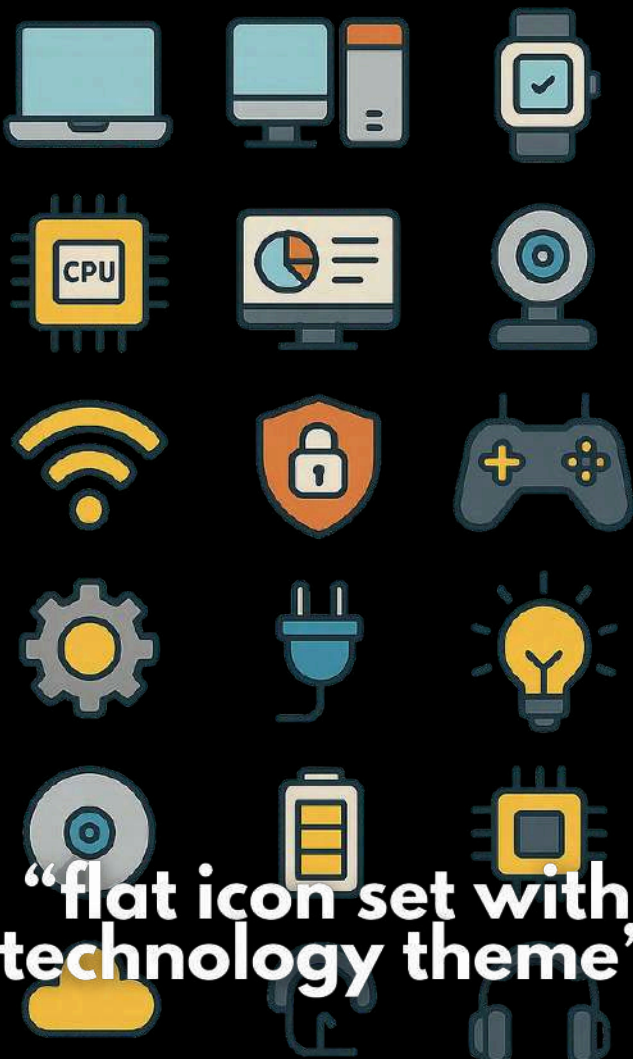

**“5-layer pyramid
template, old school
PPT style”**

“photorealism, symbols made of gold and diamonds”

“skeuomorphism
icon set, Forbidden
City theme”

“skeuomorphism
icon set with bakery
theme”

R.I.P. my slides app.
Let me delete it
for good!

Wait wait, I haven't
talked about the
limitations.

GPT-4o brings your
thoughts to life, but
it still lacks precision.

[in /tianyuxu](https://www.linkedin.com/company/tianyuxu)

Limitation #1 Limited aspect ratios is still a challenge

Having an explorer's mindset

1. Trying new things
2. Exploring boundaries
3. Collaborating with the AI
4. Always-on learning mindset
5. Be skeptical about everything

© 2025, TYAI Pte. Ltd. All rights reserved.

this slide is too boring. Use the same cat, same font, and background color of the slide. Create a landscape slide in the style of 2d vector cartoon with the cat.

1. Keep the title as is "Having an explorer's mindset"
2. And add five cartoon panels for each respective bullet point.

Having an explorer's mindset

Trying
new things

Exploring
boundaries

Collaborating
with the AI

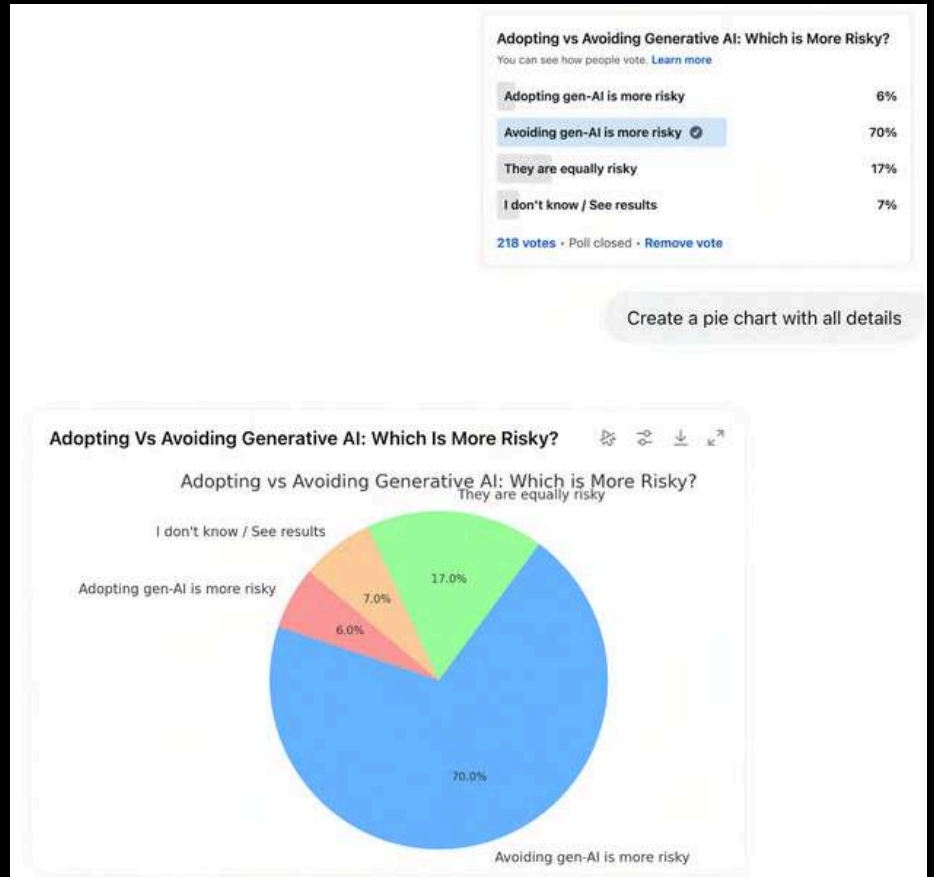

Always-on
learning mindset

Be skeptical
about everything

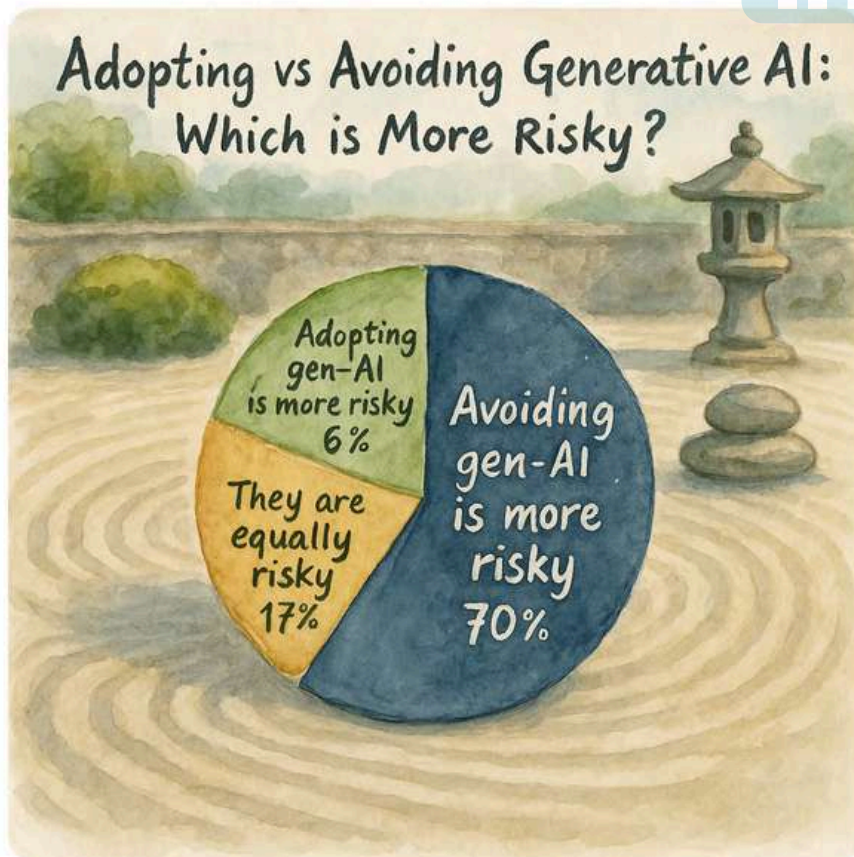

Limitation #2 Precision is relatively low for charts

convert the pie chart into an image in the style of watercolor, handwritten labels with brush. The setting is a zen garden

I'm no longer
scared of making
slides now!!

You can still work around
these limitations by uploading
an additional image as a
reference. Don't delete the
slides app, but GPT-4o will
speed you up and unleash
your creativity!
